#### **SUMMARY**

Results-driven Data Engineer with extensive experience in data integration, data warehousing, and data management. Seeking a challenging Data Engineer position to leverage my technical skills and drive business growth. Innate leadership, problem solving, interpersonal and time management skills.

### **SKILLS**

Languages: SQL, Python, Unix

Tools: Apache Airflow, AWS S3, Glue, Athena, Informatica(ETL), Cronacle, Tableau

Database: Snowflake, MySQL, Teradata, Oracle

#### **EXPERIENCE**

### Data Engineer, BOLD Technology

May 2022 - Present

- Designed and implemented ETL processes using **Apache Airflow** to extract, transform, and load data from various sources into the data warehouse.
- Managed 600+ ETL pipelines extracting data using Airflow Dags.
- Developed **Python** scripts to automate data processing and data quality checks.
- Developed and maintained complex **SQL** scripts to transform and manipulate data.
- Extracted data from different API like GoogleAds API, Bing API, Tune API using Python scripts.
- Collaborated with cross-functional teams to identify data integration requirements and design data integration solutions.
- Familiarity with Agile methodologies and project management tools such as JIRA.

## Software Engineer (ETL Developer), Tata Consultancy Services

Jun 2019 - May 2022

Supercharged Product Management (GE Healthcare)

- Involved in the analysis of requirements/defects, coding and testing.
- Developed code from scratch and high priority defect fixing.
- Optimised SQL code in production which reduces the defect by 20%.
- Created and developed mappings to load the data from diffferent sources to target database i.e **Teradata**.
- Implemented CDC which minimized the resources required for ETL
- $\bullet \ \ \text{Worked on } \textbf{Informatica} \ \ \text{transformations such as Lookup, Aggregator, Expression, Joiner, Filter, Router, Rank.}$
- Interacted with clients for getting and understanding the business requirement.
- Created 50+ ETL data pipelines for bringing data from different sources like flat files, oracle etc to ODS layer using Informatica.
- Resolved **failed** workflows and fix the issues.
- Productionize the **ETL** changes by going through the review and approval processes by interfacing with different teams like migration, operations and **DBAs**.

# PROJECTS

## COVID-19 Analysis

- Developed an **ETL** pipeline using Amazon web service.
- Worked on the Covid-19 dataset from AWS open data.
- Loaded the data sets into S3 bucket.
- Implemented IAM roles and IAM configuration for users.
- Build numerous Crawlers on the datasets to extract the information and schema of the datasets.
- $\bullet\,$  Ran Adhoc  $\mathbf{SQL}$  queries on flat files and JSON using AWS  $\mathbf{Athena}.$

### **EDUCATION**

**B.Tech**, Computer Science

Jul 2015 - May 2019

Uttar Pradesh Technical University (U.P.T.U)

12th, C.B.S.E Dayawati Modi Academy (D.M.A) May 2014 - Mar 2015

10th, C.B.S.E

May 2012 - Mar 2013

Dayawati Modi Academy (D.M.A)

### RECOGNITIONS/RESPONSIBILITIES

- Conducted sessions and webinars for newly joined associates.
- On The Spot Award, Award for Excellence Aug-2021
- Fresco Play Miles Award, Learning Awards July-2020
- Head of Technical club 'Technovation' at college
